# Advanced soldering irons for every application.

Quality soldering is a craft of precision and patience. Often, the impact of this trade is recognized in the smallest of details. One detail that stands out above the rest: sheet metal roofing is among the fastest growing markets in the industry.

To stay ahead of the competition but remain a true craftsman at the very same time, you need a soldering iron with next generation heating technology. That's why Express is the product line of choice for sheet metal professionals around the globe.

**If you're using hand irons today, Express soldering irons make it easy to deliver the same highly professional product — only in less time.**

If that's not reason enough to make the switch, here are a few more:

- Higher maximum temperatures
- A revolutionary cast iron chamber for constant and consistent heat
- Enclosed flames for safety
- Easy change-out of tips
- Dependable durability
- Increased productivity thanks to zero heat loss
- Smoother soldering joints, with no stop and start marks
- More efficient gas consumption
- Increased profits thanks to unmatched Express technology

**If you're already using a soldering iron, Express irons offer more power, productivity, and profit.**

Here are even more reasons to use Express:

- Increased power with patented multi-flame technology
- A 40% higher max temp for the same gas consumption
- Quick and convenient thumb control
- 70-seconds warm-up
- Lightweight and compact design for easy handling
- Up to eight times less noise
- Properly balanced handles for better control
- Eight tips for all conditions, including tips that last up to five times longer
- The first-ever hoseless iron for repairs
- Swivel hose attachment and enclosed flames
- Increased profits thanks to unmatched Express technology
