

# **Bosch Inverter Ducted Packaged Unit IDP**

Meet the Bosch Inverter Packaged Heat Pump (IDP). With all of the benefits of the Bosch Inverter Ducted Split systems now in a single package, the IDP offers best-in-class efficiency and comfort. The system delivers premium comfort and performance by adjusting compressor capacity rather than a simple on/off control like other traditional units, so you can enjoy maximum comfort while reducing operating costs and saving money. The system works seamlessly with your thermostat to automatically adjust to your preferences, while integrated sound dampening features keep the unit quiet for top level comfort.

#### **Features**

- Superior efficiency rated up to 19 SEER, 12.5 EER, 10 HSPF
- ► Inverter Compressor (36%-118% speed), modulation in 1% increments
- ► IDP 3T Provides up to 4-stage indoor fan control, mobile home certified for high static
  - IDP 5T Provides up to 2-stage indoor fan control
- ▶ 10 speed ECM outdoor blower for premium efficiency and whisper quiet operation
- Easy to install 2-way design allows for horizontal and downflow installations, air return/supply are field convertible
- ENERGY STAR rated
- Compatible with the Bosch Connected Control (BCC) Thermostat family<sup>(1)</sup>
- Operates in cooling up to 125°F

### **Consistent Room Temperature**

Conventional heat pumps frequently cycle on and off, resulting in uncomfortable temperature fluctuations. While inverter-driven pumps are able to self-adjust, providing consistent room temperature, even when the outdoor temperature reaches up to 125°F.

## **Consume Only the Energy You Need**

Modulating inverter systems deliver only the amount of hot or cool air needed to achieve the desired temperature – no more, no less. With up to 19 SEER and 10 HSPF, the Inverter Ducted Packaged system can provide you with maximum comfort levels at a minimum cost.

### **Quiet Comfort Achieved**

The Bosch Inverter Ducted Packaged system is one of the quietest air-to-air heat pumps on the market. Through the use of silent blade technology, sound isolating mounts and outdoor condensing section placement - the system can deliver outdoor sound levels as low as 59 dBA - which is far superior to most standard units on the market.

### **Fast Response**

It takes traditional systems a long time to reach the homeowner's desired temperature, while the boosted compressor speed of inverter systems allows for quicker, smoother and more efficient heating and cooling.

## **Intelligent Control**

The unit will adjust the output capacity to match your ideal temperature requirements. Also, with up to four stage fan control, the unit delivers enhanced humidity control.

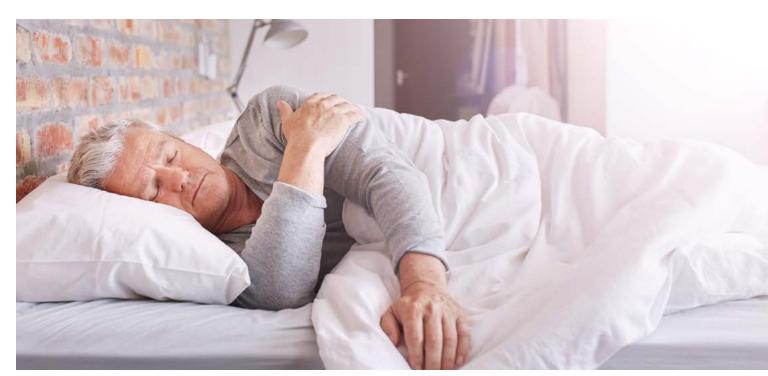

## **Energy Use is Even and Steady**

The frequent on and off of traditional units creates an in-rush current surge which uses more energy and causes unneeded wear and tear on your system. The Bosch inverter unit smoothly ramps up operation, avoiding spikes in energy use and protecting the system's life-cycle.

## Residential Limited Warranty<sup>(2)</sup>

With the residential limited warranty, you receive peace-of-mind knowing you will receive replacement parts protection for up to 10 years. This standard offering covers all components incorporated into the heat pump system at the time of manufacture. All other components or parts that are purchased from Bosch and installed in the field have a 1-year parts warranty.

(2) In Commercial applications the parts warranty goes to 3 years. Please go to boschheatingandcooling.com for full limited warranty details.

## **IDP Components**

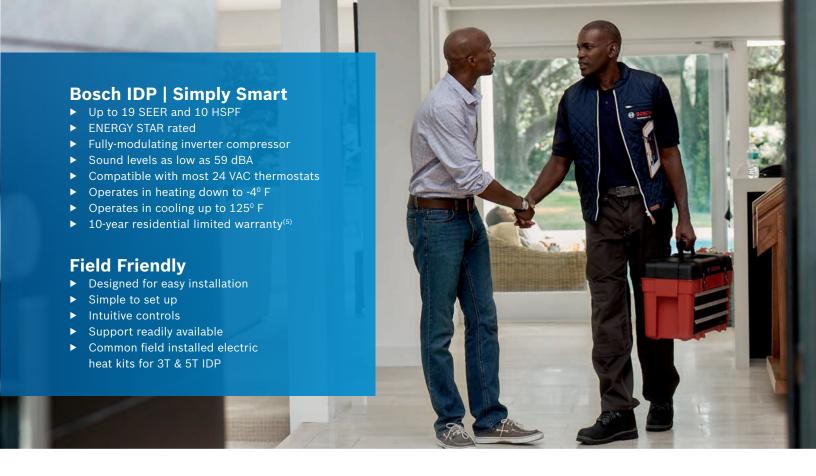

## Features & Benefits

The Bosch IDP
heat pump has
best-in-class efficiency
ratings and provides
maximum comfort
levels at a minimum
cost

## A Robust & Reliable All-In-One System

- The Bosch IDP heat pump offers a robust package and is constructed with a commercial-grade, powder-coated steel for durability. The unit comes standard for horizontal discharge applications. The unit is field convertible for downflow applications.
- The direct-drive fan blades provide vortex suppression to reduce sound of airflow exiting the condensing section, thereby retaining relatively low noise at high speed with sound levels as low as 59 dBA.
- **c** Electric Heat<sup>(3)</sup> Can accommodate electric heat with no modification to the cabinet for additional heat on-demand when you need it most.
- The indoor blower motor is a constant torque ECM motor. (4) This intuitive motor can deliver comfortable air flow at quiet sound levels, while adapting to changing conditions in your home. Additionally, the unit is a true modulating unit by varying the compressor speed for smooth temperature transitions and ultimate humidity control within the home.
- Intelligent control features help adjust the output capacity allowing the unit to keep the temperature at your desired level without fluctuation and to keep humidity in check during the summer months. Whether it be the summer or winter, the system keeps your home comfortable and the living conditions to your desired taste.
- The high-efficiency variable capacity inverter compressor can adjust to any speed between 36% and 118% (in 1% increments), to perfectly cool or heat your home using minimal energy for maximum comfort.

# About Bosch

#### **Bosch Group**

The Bosch Group is a leading global supplier of technology and services in the areas of Automotive, Industrial Technology, Consumer Goods and Building Technology. The company was founded in Stuttgart, Germany, in 1886 and presently has more than 440 subsidiaries and is represented in over 150 countries.

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket solutions, industrial drives and control technology, power tools, security and communication systems, packaging technology, thermotechnology, household appliances and software solutions. The Bosch Group's products and services are designed to improving quality of life by providing innovative and beneficial solutions. In this way, the company offers technology worldwide that is "Invented for life." Additional information is available online at boschheatingandcooling.com and bosch.ca.

#### **Bosch Thermotechnology in North America**

Bosch Thermotechnology is a leading source of high quality water heating and comfort systems. The company offers gas tankless, electric whole house and point-of-use water heaters, Bosch and Buderus floor-standing and wall mounted boilers, Bosch and FHP geothermal, water-source and air-source systems as well as controls and accessories for all product lines. Bosch Thermotechnology is committed to being Simply Smart by offering products that work together as integrated systems that enhance quality of life in an ultra-efficient and environmentally friendly manner. For more information, visit boschheatingandcooling.com.

#### **Bosch Water-Source Heat Pumps: Made in the U.S.A.**

Bosch and FHP water-source and geothermal heat pumps are made by highly trained and skilled workers in our factory based in Fort Lauderdale, Florida. They are manufactured with rigorous standards and factory testing ensuring high efficient operation over the life of the unit. Bosch's ISO 9001 and ISO 14001 certified facilities provide consistent quality in every unit built.
