

Fanpac Evaporative Coolers - Aspen Residential

Fanpac™ is a leading manufacturer of mobile Injection-molded evaporative coolers, industrial/commercial air movement fan assemblies, and is a qualified OEM supplier to the HVAC and agriculture industries. We use this knowledge and expertise to introduce the Fanpac™ Aspen Evaporative Cooler. Made with the finest materials and fitted with our own Fanpac™ brand motors and pumps, the Aspen Cooler line is the most affordable cooler in the industry.

Evaporative cooling is an all-natural way of cooling any home or business.

CFC-free and filters the air as it delivers cool, fresh air to the conditioned space.

Save up to 75% over refrigerated air systems.

The natural choice for cool, fresh, affordable filtered air.

CABINET – One piece, drawn pan construction. Corrosion resistant, heavy gauge welded steel construction for maximum strength.

DURABLE PROTECTIVE FINISH - Our commercial grade powder coat epoxy finish will resist corrosion and look good for many years.

SLIDE-IN PAD FRAMES – Embossed metal pad frame lasts longer than others. Resists scratching and chipping.

BLOWER WHEEL –Balanced forward-curved blower wheel of heavy gauge steel for quiet operation and maximum air flow.

DRIVE SYSTEM – Steel blower support bars, solid shafts, oilable bearings.

WATER PUMP – Fanpac™ by Hesaire™ low draw water pump is UL Classified and the best pump in its class in the industry. Standard with thermal protection and built-in bleed-off port.

PADS – Fitted with high performance, long fiber, aspen pads, delivering up to 7 degrees cooler air than conventional machine-made aspen pads.
