

## SPEED LOCKS

**SLB**

**SLBS**

Speed Lock is an engineered fitting used for making fast, sure connections to any type of fiberglass duct board material.

### **ADVANTAGES**

Designed to cut their own hole, eliminating the need for specific tools such as duct board knives. Exterior ring and bendable tabs provide positive protection against air loss. FLEX LOCK, the General Metals exclusive flex lock design, eliminates the need for expensive clamps, lowers labor costs and provides a positive and permanent fit. Holes are provided for installation of round dampers (sold separately) Available in two models -SLB (barrel only) & SLBS (barrel with scoop).

Patent No. 4491124

### **CONSTRUCTION**

SLB -Nested packaging for compact storage and transportation. One piece galvanized snap lock design.

SLBS -All galvanized steel, spot welded and stapled for strength and durability. The scoop is riveted for maneuverability during installation.

Uses include commercial, industrial, and residential or wherever flexible or round duct is required.

Sizes  
5" -20"
